

Project Title

Talk2Invoice: AI-Powered Voice Assistant for Food Ordering Using Whisper and DistilBERT

Objective

To develop and deploy an AI-powered voice-based restaurant ordering system that enables users to place orders using speech and text.

Deployment Link

<https://huggingface.co/spaces/sailubandi/restaurant/>

Method 1: Running the Project on Hugging Face (Cloud)

- 1 Open the deployment link in a web browser.
- 2 Navigate to the 'App' section of the interface.
- 3 Wait for the application to build automatically.
- 4 Once loaded, interact with the application interface.
- 5 Provide input (voice/text) to place food orders.

Method 2: Running the Project Locally

- 1 Clone the repository using: `git clone https://huggingface.co/spaces/sailubandi/restaurant`
- 2 Navigate to the project directory using: `cd restaurant`
- 3 Install required dependencies using: `pip install -r requirements.txt`
- 4 Run the application using: `streamlit run app.py`
- 5 Open the browser and go to `http://localhost:8501`
- 6 Test the application features.

Conclusion

The system successfully demonstrates deployment and execution of an AI-powered food ordering assistant in both cloud and local environments.
